
Technology: Maple 10 and the TI-86 graphing calculator will be used in this course. You may use any calculator for doing homework, however, you may not use a calculator with symbolic algebra capabilities (such as the TI-89 or TI-92) on tests.

Contact Information: Dr. Suzanne Riehl
WRT 330
Office Telephone: 273-2936
e-mail: riehl@math.uni.edu

Office Hours: Mondays, Wednesdays and Fridays at 2 and other times by appointment.

Grades: Course grades will be based on 4 exams and one mini-exam (450 points), homework, quizzes, and projects (scaled to 150 points) and a cumulative final exam (scaled to 150 points). (Point totals may vary slightly.) Grade cut-offs are 90%, 80%, etc. Also, your final grade will be no more than 2 letter grades higher or lower than your final exam grade.

Hourly exams are scheduled for Sep 12, Sep 30, Oct 19 (mini-exam), Oct 28, and Nov 21. The final exam is at 8 a.m. on Monday, December 12. In order to make up an exam, you must contact me prior to the test time and have a bonafide excuse. Leave a phone or email message if you can’t speak to me in person.

The attached schedule contains information on the daily topics and assignments. Come to class prepared – read the assigned section, have text and calculator, be ready to discuss and work problems. I will assume you have read the text before entering the classroom and will not plan class activities as if you’ve never seen the material before.

Some homework and quizzes will be “collected” via WebCT. To access WebCT, go to http://webct.uni.edu. Your username is the same as your UNI username (the first part of your UNI email address) and your initial password is your UNI identification number (on your ID). Note that if you have ever used WebCT at UNI in the past, your password is what you previously used.

I recommend you attend a brief training session on WebCT. Numerous sessions are offered from August 24 through September 1. See the schedule at http://www.uni.edu/its/et/tnt/c.html or call 319-273-2309 for details.

ADA: Instructional accommodations due to disabilities must be arranged through the Office of Disability Services. The ODS is located at 213 East Bartlett, 272-2676.
