UNI Physics Institute- A program for Out of Area
High School Physics Teachers

Lawrence Escalad  University of Northern Iowa
Michael Roth  University of Northern Iowa
Karen Couch Brietbach, ISTS Regional Director,  Price Lab School, UNI
Les Burns  Hudson Community High School

The UNI Physics Institute program is providing professional development in physics content and pedagogy for a cohort of out of area high school physics teachers. The program includes two 4 week summer institutes (summer 2002 and 2003) and a academic year seminar in which participants are provided with experiences that develop and reinforce their understanding of physics content, introduce innovative physics methods and resources, and provide feedback on their instruction. Learn about the program and some initial results.
